OUR HISTORY

PJSC “Lvivskiy Kholodokombinat” is the most experienced Ukrainian company in the ice cream industry.

The history of our cold sweets production started over 70 years ago in Lviv.

We carried all our experience through these years and reinforced it with innovations to achieve a synergy of traditional recipes and modern technology.

Our mission is to bring joy to our consumers by creating delicious and high-quality products.

Today, we are one of the top producers of ice cream in Ukraine and aim to widen Limo presence all over the world.

In June, 2017 our company was added to the list of EU exporters and we are ready to felicitate more people with our ice cream!

PRODUCTION PROCESS

During sales season we deliver 24 trucks to our customers daily. The company is developing dynamically and shows annual growth of 10% each year.

Natural ingredients are delivered to our production for each day production: milk, butter, condensed milk, sugar, etc. We carefully choose suppliers to assure high quality and taste of the ice cream to delight even the most fastidious consumers.

How do we create ice-cream? We mix milk, condensed milk, sugar, water and other ingredients, then start pasteurization process to kill all pathogenic bacterias. Homogenization helps our ice cream to have perfect consistency. Cooling and Chilling processes prepare our future ice cream for shaping, flavoring and glazing. After shocking hardening at -40°C , the desserts are packed. It takes at least 24 hours of further hardening (-24°C) to finish the production process when products are ready for shipment and distribution.
